Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
5. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,484,397 to Twardowski in view of US 5,052,382 to Wainwright. Twardowski discloses an artificial kidney for dialysis that includes a dialysis solution circuit 94 with filters for purifying the solution, an extracorporeal blood circuit 101, and a mixing/heating circuit 32 for preparing the dialysis solution. Twardowski discloses an ozone generator that works to disinfect the system, but does not disclose that it is used for a fluid that

Art Unit: 3762

treats the patient. However, Wainwright discloses a system and a method for generating ozone to treat a fluid used for treatment of a human body, which includes, by definition, diasylate. Wainwright further discloses a monitoring system that monitors the generation and application of the ozone. With regard to applicant's claims drawn to the function and concentration of the ozone, such a limitation amounts to a recitation of the intended use of the device, which does not patentably distinguish the structure of the claimed device from the prior art. Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to add the ozone treatment system disclosed by Wainwright to the dialysis system disclosed by Twardowski since ozone treatment of patients is well known in the art of blood treatment in order to act as an anti-viral and antibacterial agent, as taught by Wainwright.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- a. US 4,632,980 Zee et al
 - i. Ozone decontamination of blood and blood products
- b. US 6,293,921 Shinmoto et al
 - ii. Dialysis exchanger with ozone treatment
- c. US 6,379,617 Spickermann
 - iii. Dialysis machine with ozone generation
